

Here Comes a Hurricane!

Here comes a hurricane! A hurricane is coming to where we live

We don't need to worry, but we do need to be prepared.

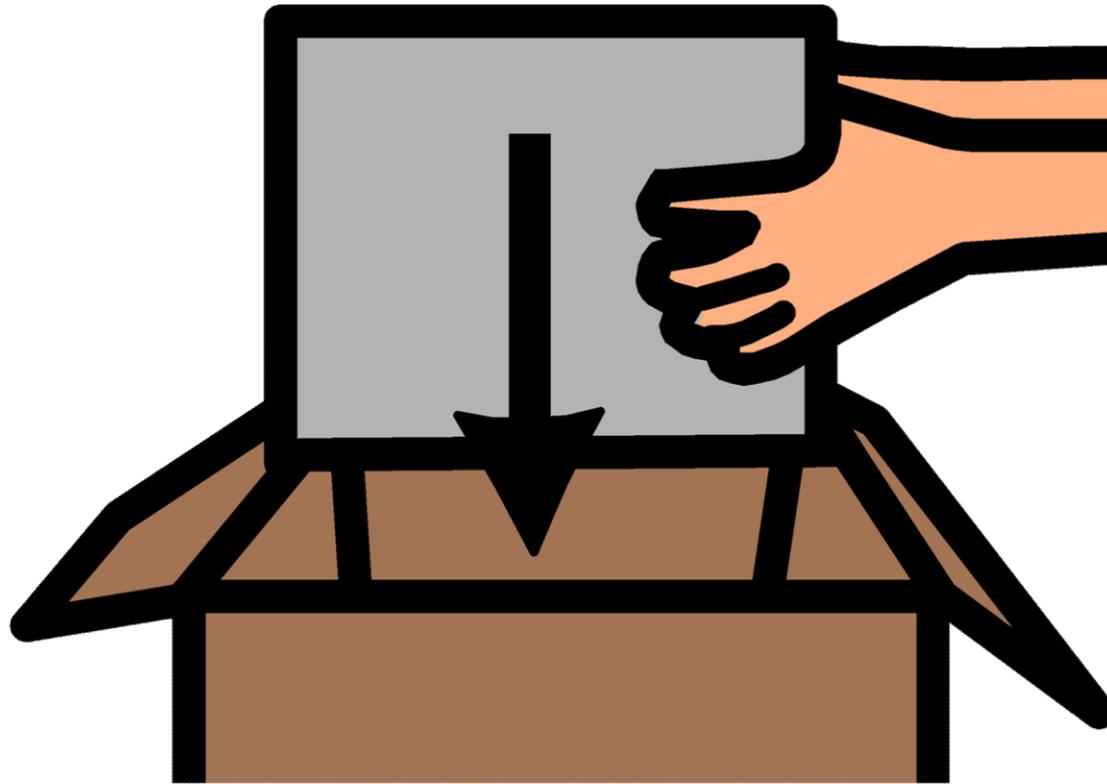

We can prepare by making an emergency kit.

We will need food, water, and flashlights.

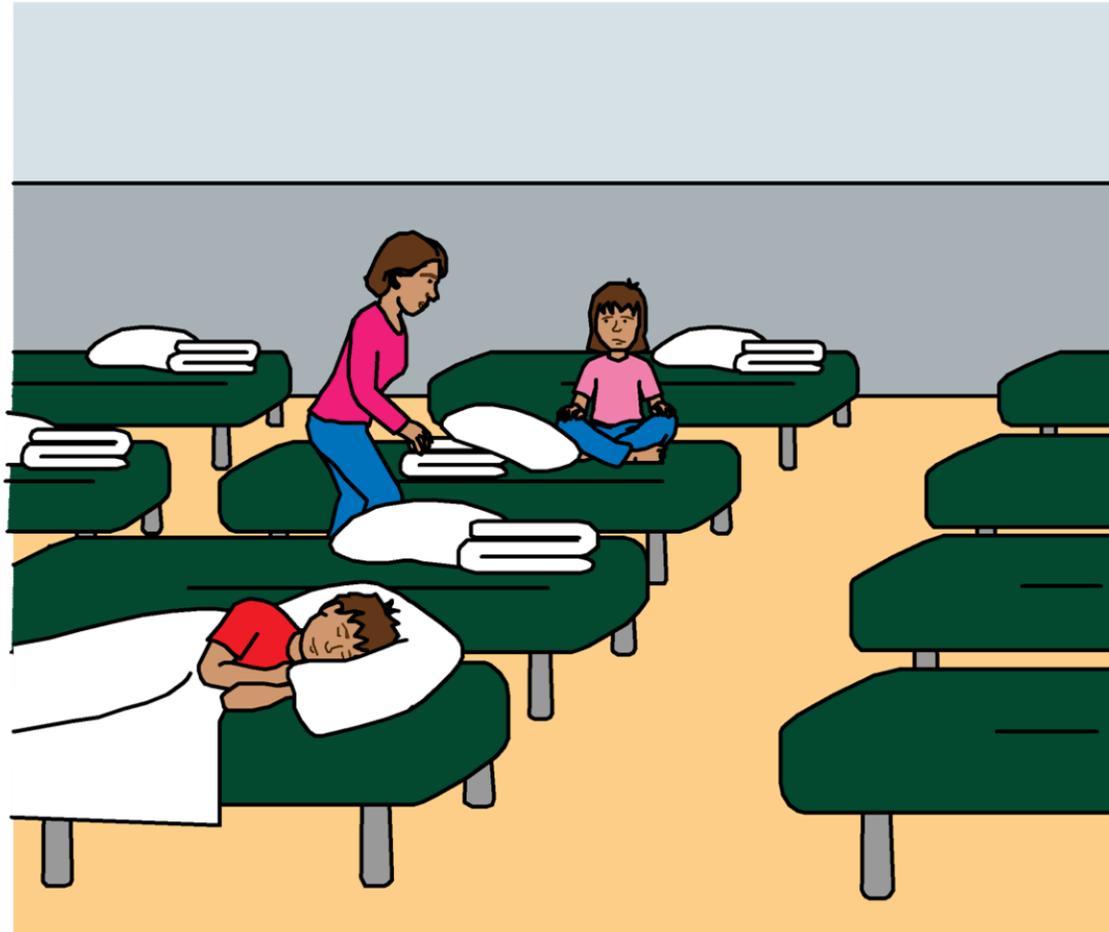

We may want cell phones, clothing, and things for a pet.

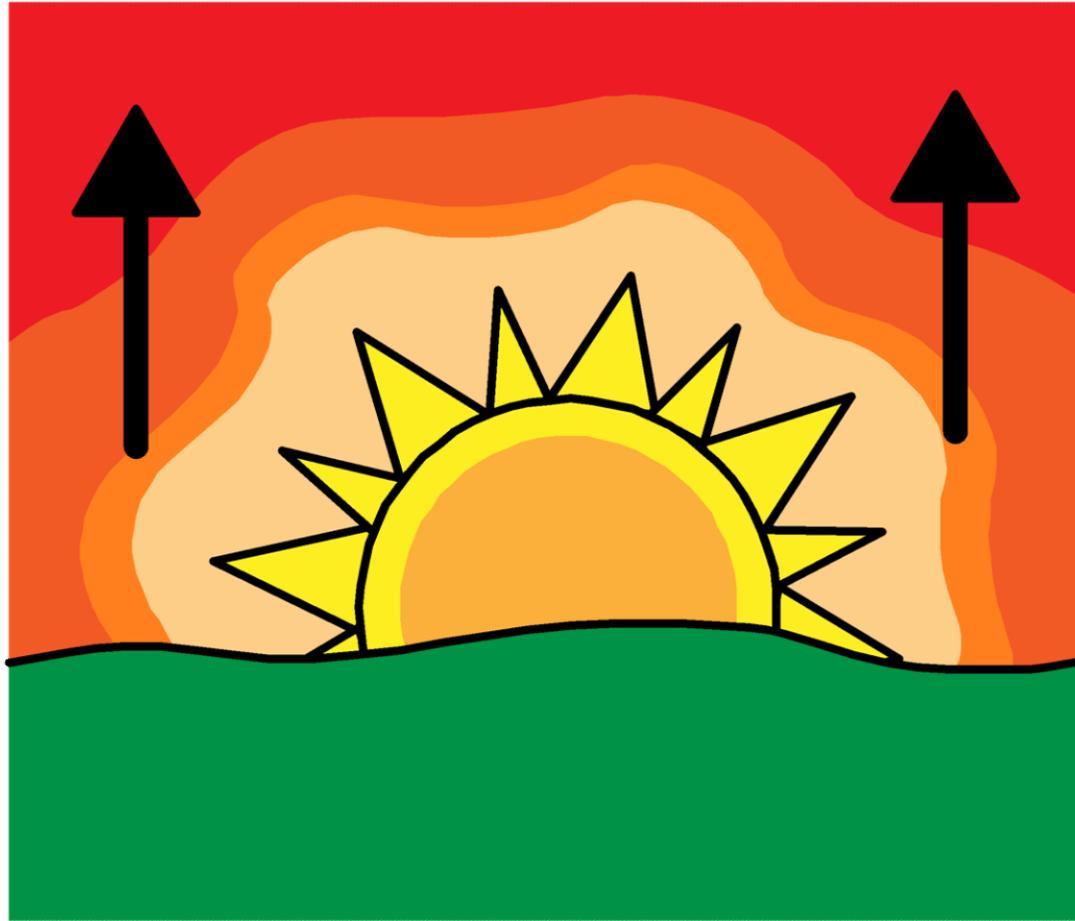

Once we've got everything together, we put them in a box.

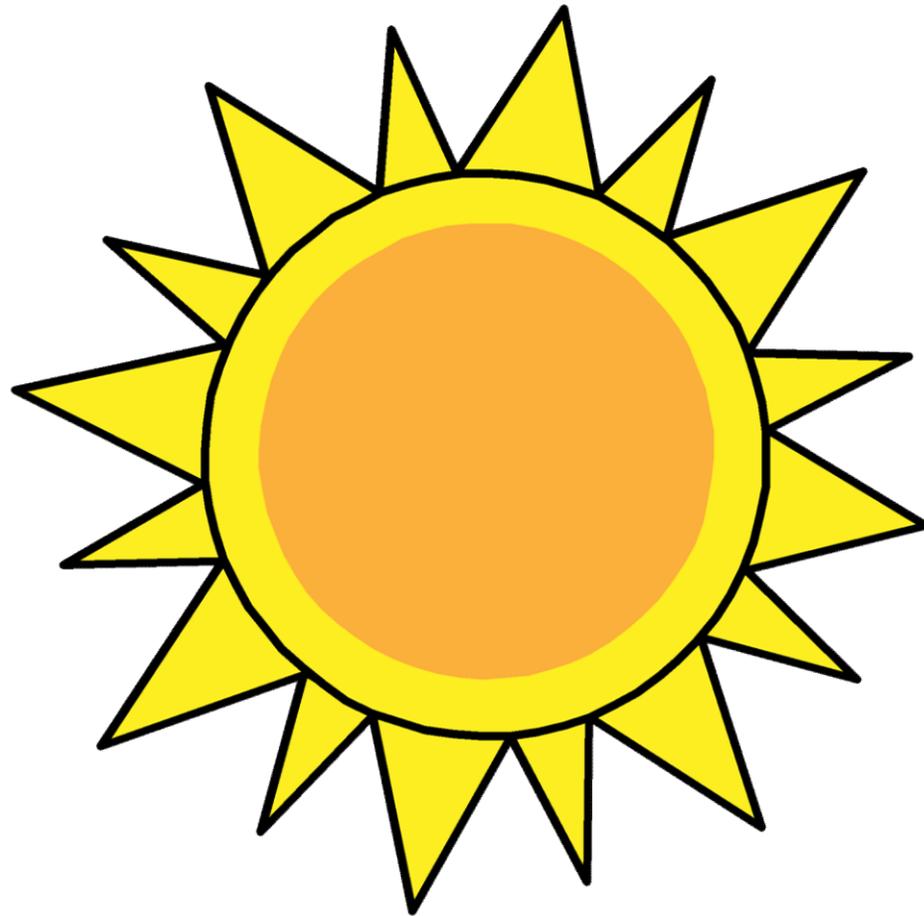

The TV will tell us where to go to stay safe.

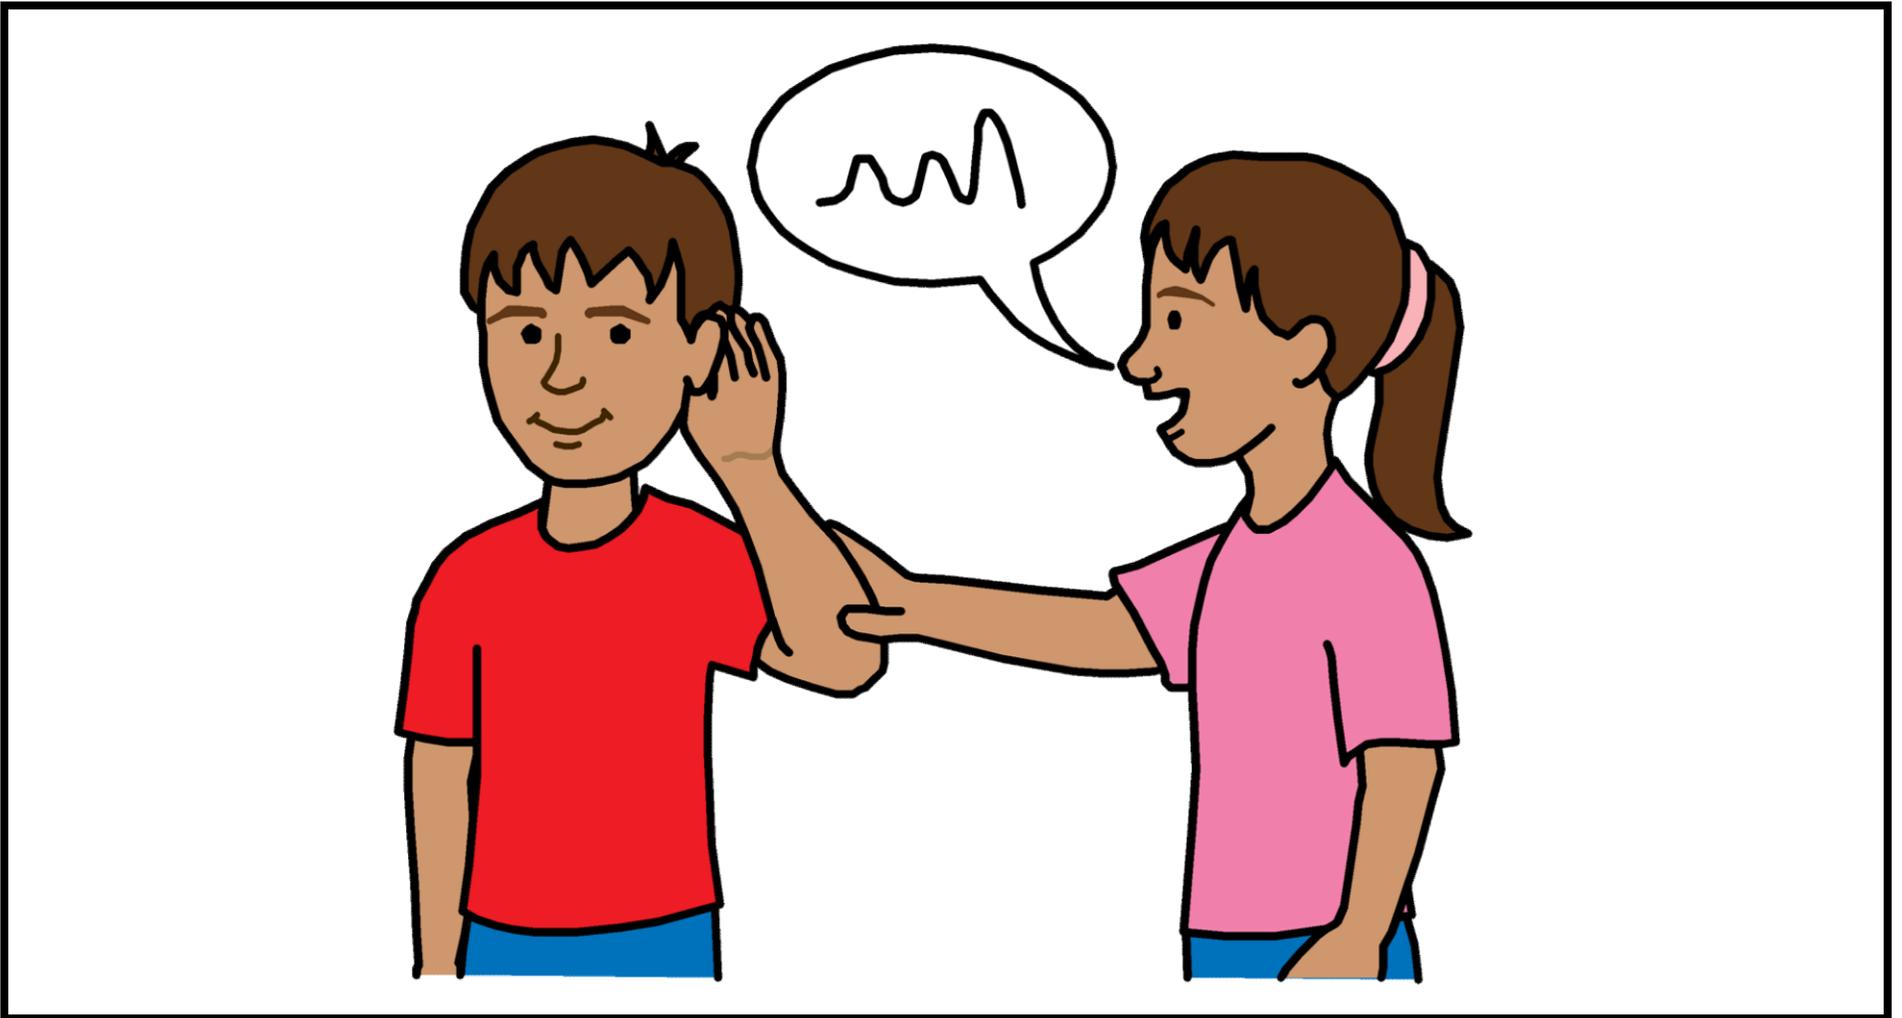

We may stay home, or we may go to a shelter.

Either way, the storm will not last long.

When it's over, the sun will come out again.

If we listen and stay together, we will survive the storm.

And we will remember it for a long, long time.
